

AJAY AUTADE

Chh. Sambhajinagar, Maharashtra | contact@ajayautade.com | +91 7820902571 <https://www.ajayautade.com>

SUMMARY

Results-driven DevOps Engineer with hands-on expertise in Kubernetes, Docker, and AWS infrastructure. Proficient in applying automation and cloud provisioning practices using Terraform, Ansible, and AWS to deliver robust and reliable systems.

EDUCATION

B.Tech in Computer Science Engineering

2019 - 2023

- Computer Science Engineering | M.G.M'S J.N.E.C. / Chhatrapati Sambhajinagar

EXPERIENCES

DevOps Engineering Intern | Invictus Web Solutions Pvt. Ltd.

June 2025 - Dec 2025

- Automated AWS infrastructure provisioning AWS (EC2, S3, VPC, IAM) using Terraform, cutting manual setup time from hours to minutes.
- Containerized 4 + applications with Docker and deployed them on Kubernetes clusters, ensuring scalability and zero-downtime deployments.
- Designed and deployed end-to-end CI/CD pipelines using Jenkins and GitHub Actions, reducing release time by 60% across 4+ applications.

Software Developer Intern | Anlage Infotech Pvt. Ltd.

Nov 2023 - April 2024

- Engineered scalable RESTful APIs to facilitate seamless, secure data exchange between distributed application components, improving overall system integration.
- Actively participated in cross-functional code reviews, architectural planning, and pair programming sessions to uphold strict coding standards and maintain a scalable codebase.
- Designed and deployed end-to-end CI/CD pipelines using Jenkins and GitHub Actions, reducing release time by 60% across 4+ applications.

PERSONAL PROJECTS

MLOps Sentiment Analyzer

Python, FastAPI, AWS (EKS, ECR, S3), Kubernetes, Docker, Terraform, ArgoCD, Prometheus, Grafana

- Built a zero-touch deployment pipeline using GitHub Actions and ArgoCD, reducing code-to-production time from 45 minutes to ~8 minutes on AWS EKS.
- Shrunk ML Docker images by 73% (3GB to 800MB) via multi-stage builds and configured Kubernetes HPA to dynamically scale pods (2 to 10) based on CPU/Memory loads.
- Achieved zero-downtime updates using custom K8s readiness probes and tracked 9 real-time inference metrics (latency, error rates) via Prometheus and Grafana.

MoviesMonkey (Cloud-Native Web App)

AWS EKS, Kubernetes, Terraform, ArgoCD, GitHub Actions, Prometheus

- Engineered a dual-pipeline GitHub Actions workflow with Trivy security scans and ArgoCD, auto-syncing Kubernetes manifests every 3 minutes for zero-touch delivery.
- Provisioned an AWS EKS cluster via Modular Terraform and deployed applications using Helm, configuring HPA to auto-scale from 2 to 10 pods at 70% CPU / 80% Memory capacity.
- Architected a 5-service monitoring stack (Prometheus, Grafana, Alertmanager) featuring 4 custom PromQL alert rules to proactively track P95 latency and 5xx error rates.

SKILLS

Cloud Platforms: AWS (EC2, S3, IAM), VPC Setup

Containerization & Orchestration: Docker (Image Creation, Dockerfile, Compose), Kubernetes (Pods, Deployments, Services, Helm, HPA, VPA)

CI/CD & Version Control: Git, GitHub, GitHub Actions, Jenkins, ArgoCD

Infrastructure as Code: Terraform (EC2, Security Groups), Ansible

Operating Systems: Linux (Ubuntu, MacOS) Programming & Scripting: Python, Bash

Databases: MongoDB, MySQL, SQL Monitoring & Logging: Prometheus, Grafana
